| Term | Definition |
|------|------------|
| BI | Business intelligence; using data to create models and make business decisions based on the models |
| CSV | Comma-separated value; a data format used in spreadsheets in which values are separated by commas, enabling data to be imported somewhere else |
| data source | External sources frequently found on the internet that hold data and data sets |
| PBIX | The file type in which Power BI Desktop files are saved |
| publish | The process of sharing reports and data from Power BI Desktop to Power BI Service, as opposed to "publishing" a written report |
| workspace | An area in the Power BI interface that contains reports, graphs, and other visuals for users to review and collaborate on |
